Jonah *Waltz-Rieber*

COMPUTER ENGINEER

Buffalo, NY · jonahwr@verizon.net
jonahs.site · github.com/CoderJonah

I build smart contracts, full-stack web apps and the infrastructure under them. Founder and engineer of PulseChainGG, a live NFT marketplace and social platform on PulseChain, with a background in computer engineering at RIT, IT support and research programming.

PROJECTS

PulseChainGG · Founder & engineer · pulsechain.gg — 2023 - present

- Designed and built 35+ Solidity contracts: ERC-721 and ERC-1155 marketplaces, English auctions, blind-mint generative collections, groups, usernames and subscriptions.
- Gasless onboarding through an EIP-2771 forwarder, EIP-712 signatures and session keys, so gift-link recipients can mint and trade before they hold any PLS.
- Next.js and TypeScript app (wagmi, viem, RainbowKit), XMTP encrypted DMs, IPFS with Arweave archival through Irys, and a Ponder indexer.
- Tested with Slither, Echidna, Hardhat, Foundry and Puppeteer. An audit pass found and fixed 5 bugs (1 critical, 4 high) before launch.

Gr8hair · Full-stack web app · gr8hair.vercel.app — 2026

- Multi-tenant salon platform on Next.js 14, Prisma, Postgres (Neon) and Auth.js, with owner, artist and client roles.
- 8-step booking flow that charges through each stylist's own Square account; HMAC-verified, idempotent webhooks; daily NYS license checks.

Reaction time & peripheral vision study · STAT-325 Design of Experiments — 2026

- 2×2 within-subject factorial design. A C++ harness reads clicks from Linux evdev at a locked 240 Hz; analysis in R.

DocVR · BrickHack 7 winner, Best COVID-19 Hack — 2021

- VR doctor's office in Unity XR with a Dialogflow virtual doctor, backed by CockroachDB and Flask. Team of four.

EXPERIENCE

Service Desk Analyst · PCI · Remote — Oct 2023 - Jan 2024

- Resolved client tickets from password resets to software management with Datto RMM. Passed Kaseya Certified Technician training.

Co-op Student / Research Apprentice · Roswell Park Comprehensive Cancer Center — Jan 2018 - Jan 2019

- Programming support for the Women's Circle of Health Study, mentored by Chi-Chen Hong, PhD.

AutoZone · Buffalo, NY — Dec 2025 - present

Uber & Lyft · driver, rated 4.98 / 4.99 — 2017 - 2023

William & Jefferson Inc. · Hamburg, NY — 2013 - 2016

La Nova Pizzeria · food preparer — Mar - Jul 2025

Walmart · promoted to sporting goods — 2016 - 2017

EDUCATION

Rochester Institute of Technology · Kate Gleason College of Engineering — B.S. in progress

- Computer Engineering, immersion in Applied Statistics. Courses include Digital System Design I & II, Computer Architecture, Computer Organization, Assembly Language, Circuits I & II, Electronics I, Data & Communications, Probability & Statistics, Design of Experiments and CS I & II.
- Team lead, Solar Radio Telescope (Multidisciplinary Senior Design, 2021). Nominated for the RIT Computing Medal.

Frontier Central High School · Regents Diploma with Advanced Designation and Honors — 2014

SKILLS

LANGUAGES	Solidity, TypeScript, JavaScript, Python, C, C++, C#, R, SQL, Lua, assembly
WEB	Next.js, React, Node.js, Tailwind, Prisma, PostgreSQL, Auth.js, REST, webhooks, Netlify, Vercel
WEB3	Hardhat, Foundry, OpenZeppelin, ethers, viem, wagmi, IPFS, Arweave/Irys, XMTP, Ponder
SYSTEMS & IT	Linux, Windows XP–11, Docker, WSL, VMs, Git, Datto RMM, Kaseya, llama.cpp on CUDA
XR & HARDWARE	Unity (10 years), Unity XR, SolidWorks, Marlin firmware, digital logic
